WHEREAS, the General Assembly finds and declares it is in the public interest to shorten the time required for a citizen to request and receive emergency aid; and

WHEREAS, the General assembly finds and declares that the benefits of "911" service should be widely available, regardless of whether a "911" call is placed from a traditional landline telephone or from a wireless telephone and it is also in the public interest that users of wireless telephones should bear some of the cost of providing this service, as users of landline telephones currently do; and

WHEREAS, it is the intent of the General Assembly to bring wireless telephone service within the scope of Section 46-5-121 of the O.C.G.A. and to establish a means by which local public safety agencies may provide enhanced "911" service to wireless telephone users; and

WHEREAS, "wireless service" means "commercial mobile service" as defined under Section 332(D) of the Federal Telecommunications Act of 1996 (47 U.S.C. Section 157 et seq.), regulations of the Federal Communications Commission, and the Omnibus Budget Reconciliation Act of 1993 (PL 103-66) and included real-time, two-way interconnected voice service, which is provided over networks, which utilize intelligent switching capability and offer seamless handoff to customers; and

WHEREAS, "wireless service supplier" means a provider of wireless service; and

WHEREAS, wireless "telecommunication connection" means any mobile station for wireless service, which is assigned a number containing an area code assigned to Georgia by North American Numbering Plan Administrator that connects a provider of wireless service to a provider of local exchange telephone service; and

WHEREAS, "wireless enhanced "911" charge means a contribution to the local government for the cost to the local government of implementing or upgrading, and maintaining, an emergency "911" system, which is capable of receiving and utilizing automatic number identification, the location of the base station or cell site, which receives the "911" call, and the location of the wireless telecommunication connection, as it relates to "911" calls made from a wireless telecommunication connection.

Nonrecurring and recurring installation, maintenance, service, and network charges of a wireless supplier to provide the aforementioned information and other cost, which may be paid with money from the Emergency Telephone system Fund, pursuant to Subsection (e) of code 46-5-134 of the O.C.G.A.; and

WHEREAS, Section 46-5-133 of the O.C.G.A. authorizes any local government, which prior to 1988, operated or contracted for the operation of an enhanced emergency telephone number "911" system, which is capable of providing or provides enhanced "911" service to persons or entities with a wireless telecommunications connection, excluding a military base, to adopt an ordinance to impose a monthly wireless enhanced "911" charge upon each wireless telecommunication connection subscribed to by telephone subscribers whose billing address is within the jurisdiction of the local government. On or after January 1, 1999, no monthly "911" charge provided for may be imposed or continue to be imposed unless each dispatch center funded in whole or in part from such charges is in compliance with Code Section 36-80-19, relating to required TDD training for communication officers; and

WHEREAS, after July 1, 2002, 30 cents of the monthly wireless enhanced "911" charge imposed shall be deposited in a separate restricted reserve account of the Emergency Telephone System Fund, which shall be designated as the Wireless Phase II Reserve Account.
